**CONVENTIONAL**

*GS CONVENTIONAL uses patented POLYMION technology. Advanced separator technology which reduces resistance to generate 30% more starting power than other batteries on the market. This means less time for charging and holds the charge longer. We deliver higher cranking power!*

**GS**  
**BATTERY**

**CB SERIES**

*GS-CB HIGH PERFORMANCE series uses a special lead alloy which reduces self discharge, maximizes starting power, even after months of storage. Made with the most advanced technological battery construction methods known. The CB series uses special active material compound to resist vibration and heavy-duty glass mat is used to resist shedding. We deliver durability!*

**MAINTENANCE FREE**

*GS-GT SEALED MAINTENANCE FREE batteries deliver the highest reliability with the most cranking power. GS uses gas recombine technology to eliminate water loss. Once it's filled with acid, the battery is permanently sealed. No more worries about filling your battery or checking the acid levels. GS-GT series uses the most advanced sealed battery technology to protect your valuable vehicle, parts and accessories from acid leaks. We deliver peace of mind!*
